

10 CYBER RESOLUTIONS

I WILL...

... change all default passwords on my personal and work devices

... regularly check for updates to the operating systems of my laptop, computer and mobile phone

... install strong anti-virus software and keep it updated

... think twice before clicking on unknown links or attachments in an email

... authorise payments to new transfer partners via telephone to minimise risk of fraud

... not share sensitive information on social media that could be used against me in phishing attacks

... back up my entire system at least once a week on an external hard drive

... encrypt my mobile phone and all of my other devices

... talk to my kids (or parents) about how to stay safe online

In the event resolutions 1-9 fail, I'll have cyber insurance in place to save the year!
